HOW TO ORDER

It's easy!

CREATE AN ACCOUNT

Create your team account at Podiumwear.com.

1

2

PRODUCT & FIT GUIDANCE

Our sales and design team will guide you through product and design decisions for your Team Storefront.

STOREFRONT ORDERS

Send a link to your team members then sit back, put your feet up and watch the orders come in.

3

4

PRODUCTION

Once your team storefront closes we will begin producing your order in our St. Paul facility.

DELIVERY

We will deliver your order to the team manager. It's also possible to ship directly to each athlete.

5

JERSEYS

We offer three levels of jerseys - Gold, Silver, and Bronze. At each level we offer a Men's fit, Women's fit as well as Full Zip and 3/4 Hidden Zip. In addition, your team may be interested in the Long Sleeve or Short Sleeve Freeride Jersey without dump pockets.

1

GOLD LEVEL JERSEY

If you like your jersey to feel like a second skin, the gold jersey is perfect for you. This is our lightest weight jersey. The fabric has a bit of spandex in it so it stretches with you. This jersey leaves little to the imagination. In other words, it will show that extra donut you had for breakfast. The skin-tight fit ensures that the fabric's ultra wicking ability will be put to full use. All seams are flat lock stitched allowing the seams to lie flat against your skin instead of digging in. Our clients have described this as the most comfortable high-performance jersey they've ever worn.

2

SILVER LEVEL JERSEY

If you like your jersey to be very close-fitting but not completely skin-tight, the silver jersey is a good fit. It uses two specially sourced fabrics, chosen for their durability and wicking ability. The cut of the jersey is closest to what has been called an "American race" or "pro" fit. There's not going to be any extra fabric flapping in the wind but it will be more forgiving in the donut department. Our clients have described this as the classic professional racing jersey.

3

BRONZE LEVEL JERSEY

If you're comfortable riding in a tee-shirt but you also need pockets for your gear, the bronze jersey is the one for you. This is a casual fit jersey for the cyclist who wants comfort and versatility above all else. The fit is closest to what is referred to as a "club" or "sport" fit. The fabric is breathable, wicks well, and is soft to the touch. Our clients have called this the perfect recreational jersey.

4

LONG SLEEVE SILVER LEVEL JERSEY

If you need a jersey for cooler weather, the silver long sleeve jersey is just the thing. It's made of a soft micro-grid fabric that is slightly heavier than our short sleeve silver jersey. One of our clients told us the fabric felt like "unicorn fur" - no kidding, it's that soft! This is a unisex-only jersey so women should size accordingly.

5

SHORT SLEEVE FREERIDE JERSEY

This is a short sleeve jersey without dump pockets. This is the perfect jersey for the athlete who wants to wear his/her jersey for multiple sports in warm weather.

6

LONG SLEEVE FREERIDE JERSEY

This is a long sleeve jersey without dump pockets. This is the perfect jersey for the athlete who wants to wear his/her jersey for multiple sports in cooler weather.

BIBS, SHORTS & ACCESSORIES

Podiumwear offers two types of custom cycling shorts and three types of custom cycling bibs. All are offered in **Men's and Women's fits**. Arm, Leg and Knee warmers are unisex sizing.

1

GOLD LEVEL BIBS

If you are looking for high performance bibs with a silky-light feel, the gold bibs are perfect for you. The fabric is aerodynamic, highly breathable and wicks extremely well. Flat lock stitching throughout means no bulky seams digging in. Clients say these bibs are ultra light and fit like a second skin. These bibs were developed for the serious rider who spends long days in the saddle and wants non-constricting comfort.

2

SILVER LEVEL BIBS/SHORTS

If you want high performance in a compressive bib or short, silver is right for you. In addition to its compression, the fabric is highly durable. Flat lock stitching is long wearing and comfortable. Clients say these are their go-to for tough races and fast rides. They were developed for the workhorse racer who likes compression and needs a product that will outlast a long season.

3

BRONZE LEVEL BIBS/SHORTS

If you are looking for a traditional bib or short with great reliability and value, bronze is right for you. The fabric is moderately compressive for a secure fit, breathes well and wicks moisture away. Overlock stitching on all seams gives a smooth, uncomplicated finish. Our clients have said these shorts and bibs surpass any you can buy off the rack at your local bike shop. They were developed for the recreational rider who wants a classic fit with reliable durability.

4

ARM & LEG WARMERS

Our arm and leg warmers are made of a brushed thermal knit fabric that will keep you warm and will be soft and cozy against your skin. Silicone grippers at the upper arm and upper leg will keep them from sliding down. The leg warmers have a locking zipper at the ankle opening for easy on and off. These can add a fun design element to your team's overall look.

5

KNEE WARMERS

Our knee warmers are great for training and racing when it's cool but not frigid. The knee warmers use the same brushed thermal knit fabric as our arm and leg warmers and have silicone gripper on the upper leg. They can also be a fun element to customize with your kit.
